EDUCATION

InHolland University of Applied Sciences **Netherlands**
Bachelor in Information Technology *2024-Present*

- Awarded Propedeuse.
- Student Assistant supporting first-year IT students with coursework and technical guidance.
- Focus: Software development, security, data & AI, web applications, and practical industry projects.

PROJECTS

ItineraryHub – Travel Planning Web Application Github

- Built a scalable custom MVC architecture (no frameworks) with clear separation of Controllers, Services, and Views and implemented widely used patterns.
- Achieved real-time, no-refresh UI updates ontrip invitations using AJAX and REST APIs.

Chapeau - Restaurant Ordering System Github

- Developed the Kitchen and Bar View, enabling real-time order tracking and status management for restaurant staff.
- Collaborated in a 4-person team to build a full-stack C# and MySQL restaurant system with complete CRUD functionality.

WORK EXPERIENCE

Wabi Inc. **Argentina**

Operations Analyst *2020–2022*

- Managed Salesforce, GraphQL services, and the internal web administration platform to onboard and configure 200+ restaurant accounts, improving account setup efficiency by 30%.
- Optimized data workflows in collaboration with marketing and CRM teams, automating onboarding processes and reducing manual configuration time by 25%.
- Resolved technical issues related to account configurations, API integrations, and system errors, reducing support resolution time by 20% and improving platform reliability.
